## TREATMENT GUIDE FOR COMMON PIGLET DIARRHEA

COLOR OF FECES	CAUSE	AGE AFFECTED	TREATMENT
White Pasty Diarrhea	Milk Scours (Undigested Milk)	14 Days above	Animycin Suspension
Yellowish White, Watery w/gas Bubble	Colibacillosis (E. coli)	Peak at 4 days	Animycin Suspension
Bright Yellow Tinged w/blood	Salmonellosis (Salmonella)	15 days above	Xzol 24%
Yellow Gray Watery w/blood mucus	Swine Dysentery (Treponema)	7 days above, peak at 2 weeks	Isolan 5% & Isolan 20%
Yellow Gray Profuse Watery Diarrhea	Coccidiosis (Isospora)	7 - 21 days of age	Belmet
Brownish	Ascariasis (Roundworm)	All ages	Pidro
Reddish Brownish w/gray shred of tissue debris	Clostridial Diarrhea (Clostridium)	Typically at 7 days of age	Animycin Suspension
		Older than 7 days of age	Stellite

## COMMON BACTERIAL INFECTIONS & DISEASES IN PIGS

BACTERIUM	DISEASE	AGE AFFECTED	TREATMENT
<b>INTESTINAL *</b>			
Escherichia coli	Post weaning diarrhea	5 - 14 days after weaning	Xzol 24%
Clostridium perfringens	Type A diarrhea	10 - 21 days weaned pigs	Stellite
Salmonella Spp.	Occasional diarrhea, septicemia, death, cholerae	Grower pigs 6 - 16 weeks	Xzol 24%
Lawsonia intracellularis	Porcine proliferative enteropathy (ileitis) Regional/necrotic ileitis Porcine hemorrhagic enteropathy	Grower pigs and Finishing pigs 16 - 40 weeks	Isolan 20%
Treponema hyodysenteriae	Swine Dysentery	Growers & finishers, 6 - 26 weeks, all ages	
Brachyspira pilosicoli	Intestinal Spirochaetosis Colitis	Grower pigs	
<b>RESPIRATORY *</b>			
Pasteurella multocida	Bacterial Pneumonia	1 - 8 weeks after weaning	Concetrin LA
Bordetella bronchiseptica	Atrophic Rhinitis, sneezing	Nasal distortion lasts for life	
Mycoplasma hyopneumoniae	Enzootic pneumonia	Grower, finisher	
Pasteurella multocida	Mycoplasma-induced respiratory disease (MIRD)	Grower, finisher	
Actinobacillus pleuropneumoniae	Pleuro-pneumonia	Grower - finisher	
<b>SYSTEMIC *</b>			
Escherichia coli	Bacteremia, arthritis, navel infections, Cystitis, nephritis	Post-weaning	Xzol 24%
Streptococcus suis	Meningitis, endocarditis, arthritis & peritonitis	2 - 10 weeks	Concetrin LA
Haemophilus parasuis	Glasser's disease (arthritis, pericarditis, peritonitis)	2 - 10 weeks	
Mycoplasma hyosynoviae	Mycoplasmal arthritis	16 weeks and above	
Staphylococcus aureus	Bacteraemia, MMA (Mastitis, metritis agalactia), retained placenta, Vaginal discharge syndrome	All age groups	Stellite
Staphylococcus hyicus	Exudative epidermitis and greasy pig disease	Pre & post weaning piglets	Isolan 20%
Erysipelothrix rhusiopathiae	Erysipelas (dermatitis, arthritis & endocarditis)	Grower, finisher & sows	
Leptospira ecterohemorrhagiae	Leptospirosis, stillbirth, abortion, return to heat	Sow, gilt	Xzol 24% Concetrin L.A
